

University Student Legal AID

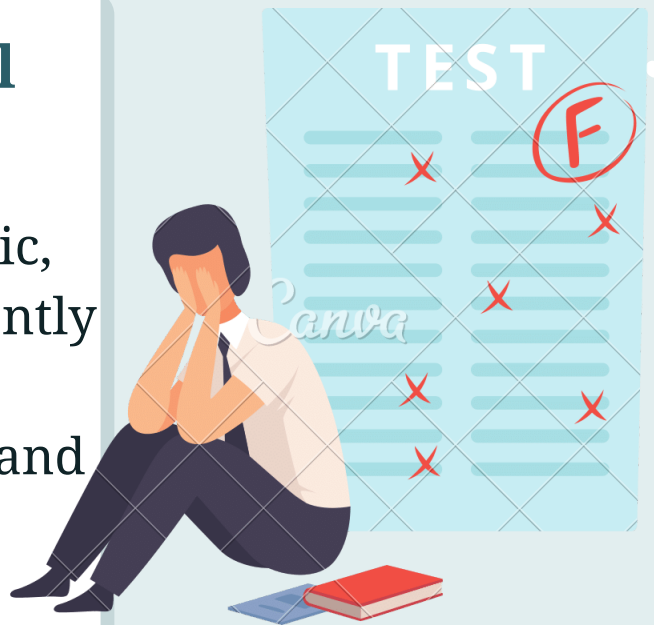

What is Meant by "Legal Needs"

Many students will often face a variety of legal problems, including landlord-tenant disputes, traffic violations, domestic violence, misdemeanors, etc.

Negative Impact of Legal Needs on Students

Legal issues, whether economic, social, or personal, can significantly disrupt a student's ability to maintain focus on coursework and to continue engagement in university life.

What Exactly is the Proposal to Help Students?

Our proposal is for Universities to create low-cost, high quality legal representation programs that offer a continuum of services for all students.

Why Should Universities Have This Legal Needs Program

Many Universities around the country are providing legal services to help their students succeed in all aspects of their lives especially academically.

Over the coming year a group of Access to Justice students from a major Philadelphia Law School will continue developing the Program. In the meantime, have a look around our website for a glimpse of what we've been doing and for resources!
